

INNOVATION
THAT LEAVES
RISK BEHIND.

Securing Your World

Risk Consulting

Software & Technology

Systems Integration

Security Officers

Today, security risks are on the rise. Being prepared for these risks requires a comprehensive approach to your organization's security plan and execution. A reactive approach is no longer acceptable.

Your security requires an innovative, well-equipped and well-trained partner. That partner is G4S. We have developed an advanced process that assesses your security needs and vulnerabilities. It's a process that allows us to confidently address your risks with our industry-best mixture of technology, integration and manpower.

Once our plan, technology and people are in place, your entire organization will begin to recognize the benefits.

The benefits are profound. G4S can help you to experience higher productivity, better morale, and pronounced improvement in your bottom line. Your organization will know that all is well, safe and secure.

Let's learn more.

INNOVATE

Risk Consulting

Software & Technology

Systems Integration

Security Officers

Innovation inspired
by 100 years of
**security experience
and passion.**

G4S has a 100-year legacy of innovation in the security business. We never stop evolving and perfecting our people, products and services. We've developed new processes to assess and thwart security risks. We've created new technologies to help our security personnel execute their jobs more efficiently.

Integrated Security Solutions is our latest innovation. G4S has developed a new approach to address today's security challenges. Our process is based around four major components: **Assess. Integrate. Equip. Staff.** The goal is to create the most secure environment possible in the most efficient way possible.

We will **ASSESS** and evaluate your risks.

We will **EQUIP** your solutions with technology that will create more efficient and effective methods of protecting your people, products, assets and reputation.

We will develop a solution and **INTEGRATE** our solutions with your company, your technology and your environment.

We will **STAFF** your solution with the correct personnel. The right roles, the right numbers and the right training combined with the right integrated technology.

ASSESS

Risk Consulting

**You can't defeat risk
unless you assess
and evaluate risk.**

G4S' Corporate Risk Services team focuses on helping customers assess and identify risk so that you can make better security decisions. Business risks are an unavoidable reality. We provide access to unparalleled industry knowledge, expert consulting and integrated technologies, backed by customized business models, extensive global resources and outcomes.

We find areas of vulnerability

Our teams work cross-functionally within your organization to identify risk in your strategy, finance, operations and compliance policies. We support you in defining your strategy, formulating business objectives and managing performance while achieving a balance between risk, opportunity and return on investment.

We establish the facts

G4S helps you to determine cause, identify wrongdoing, curtail and recover losses to protect your bottom-line and brand integrity. We work with executives, senior management and legal counsel to evaluate each situation, pinpoint objectives and develop a strategy. This enables us to identify information, sources and loss responsibility while gathering evidence to support civil, criminal or regulatory action.

Finding risk before it finds you

Business operations are often impacted by events around the world such as local and global politics, the economy, terrorism and environmental hazards. To help you adapt to the evolving risk landscape, G4S has developed a 24/7/365 Global Risk Intelligence Center that delivers access to comprehensive intelligence ensuring near real-time awareness of dynamic risks that matter to you.

Protecting your most valuable assets

Your executives, dignitaries, high-profile individuals and their families are increasingly at risk of assault, kidnapping and other threats. G4S minimizes risk while maintaining a daily routine. Our experts are culled from the military and law enforcement. They are held to the highest standards and have mental and physical skills honed through extensive training and real-world experience.

Because the state
of our world
calls for
state-of-the-art
technology.

EQUIP

Software & Technology

G4S equips customers with software and technology to provide unique solutions to meet their ever-changing needs. In addition to RISK360,[®] our incident management software, and SecureTrax,[®] our mobile officer-management platform, we also leverage the power of our Symmetry[™] Security Management System from AMAG Technology, a G4S company.

We offer many advantages

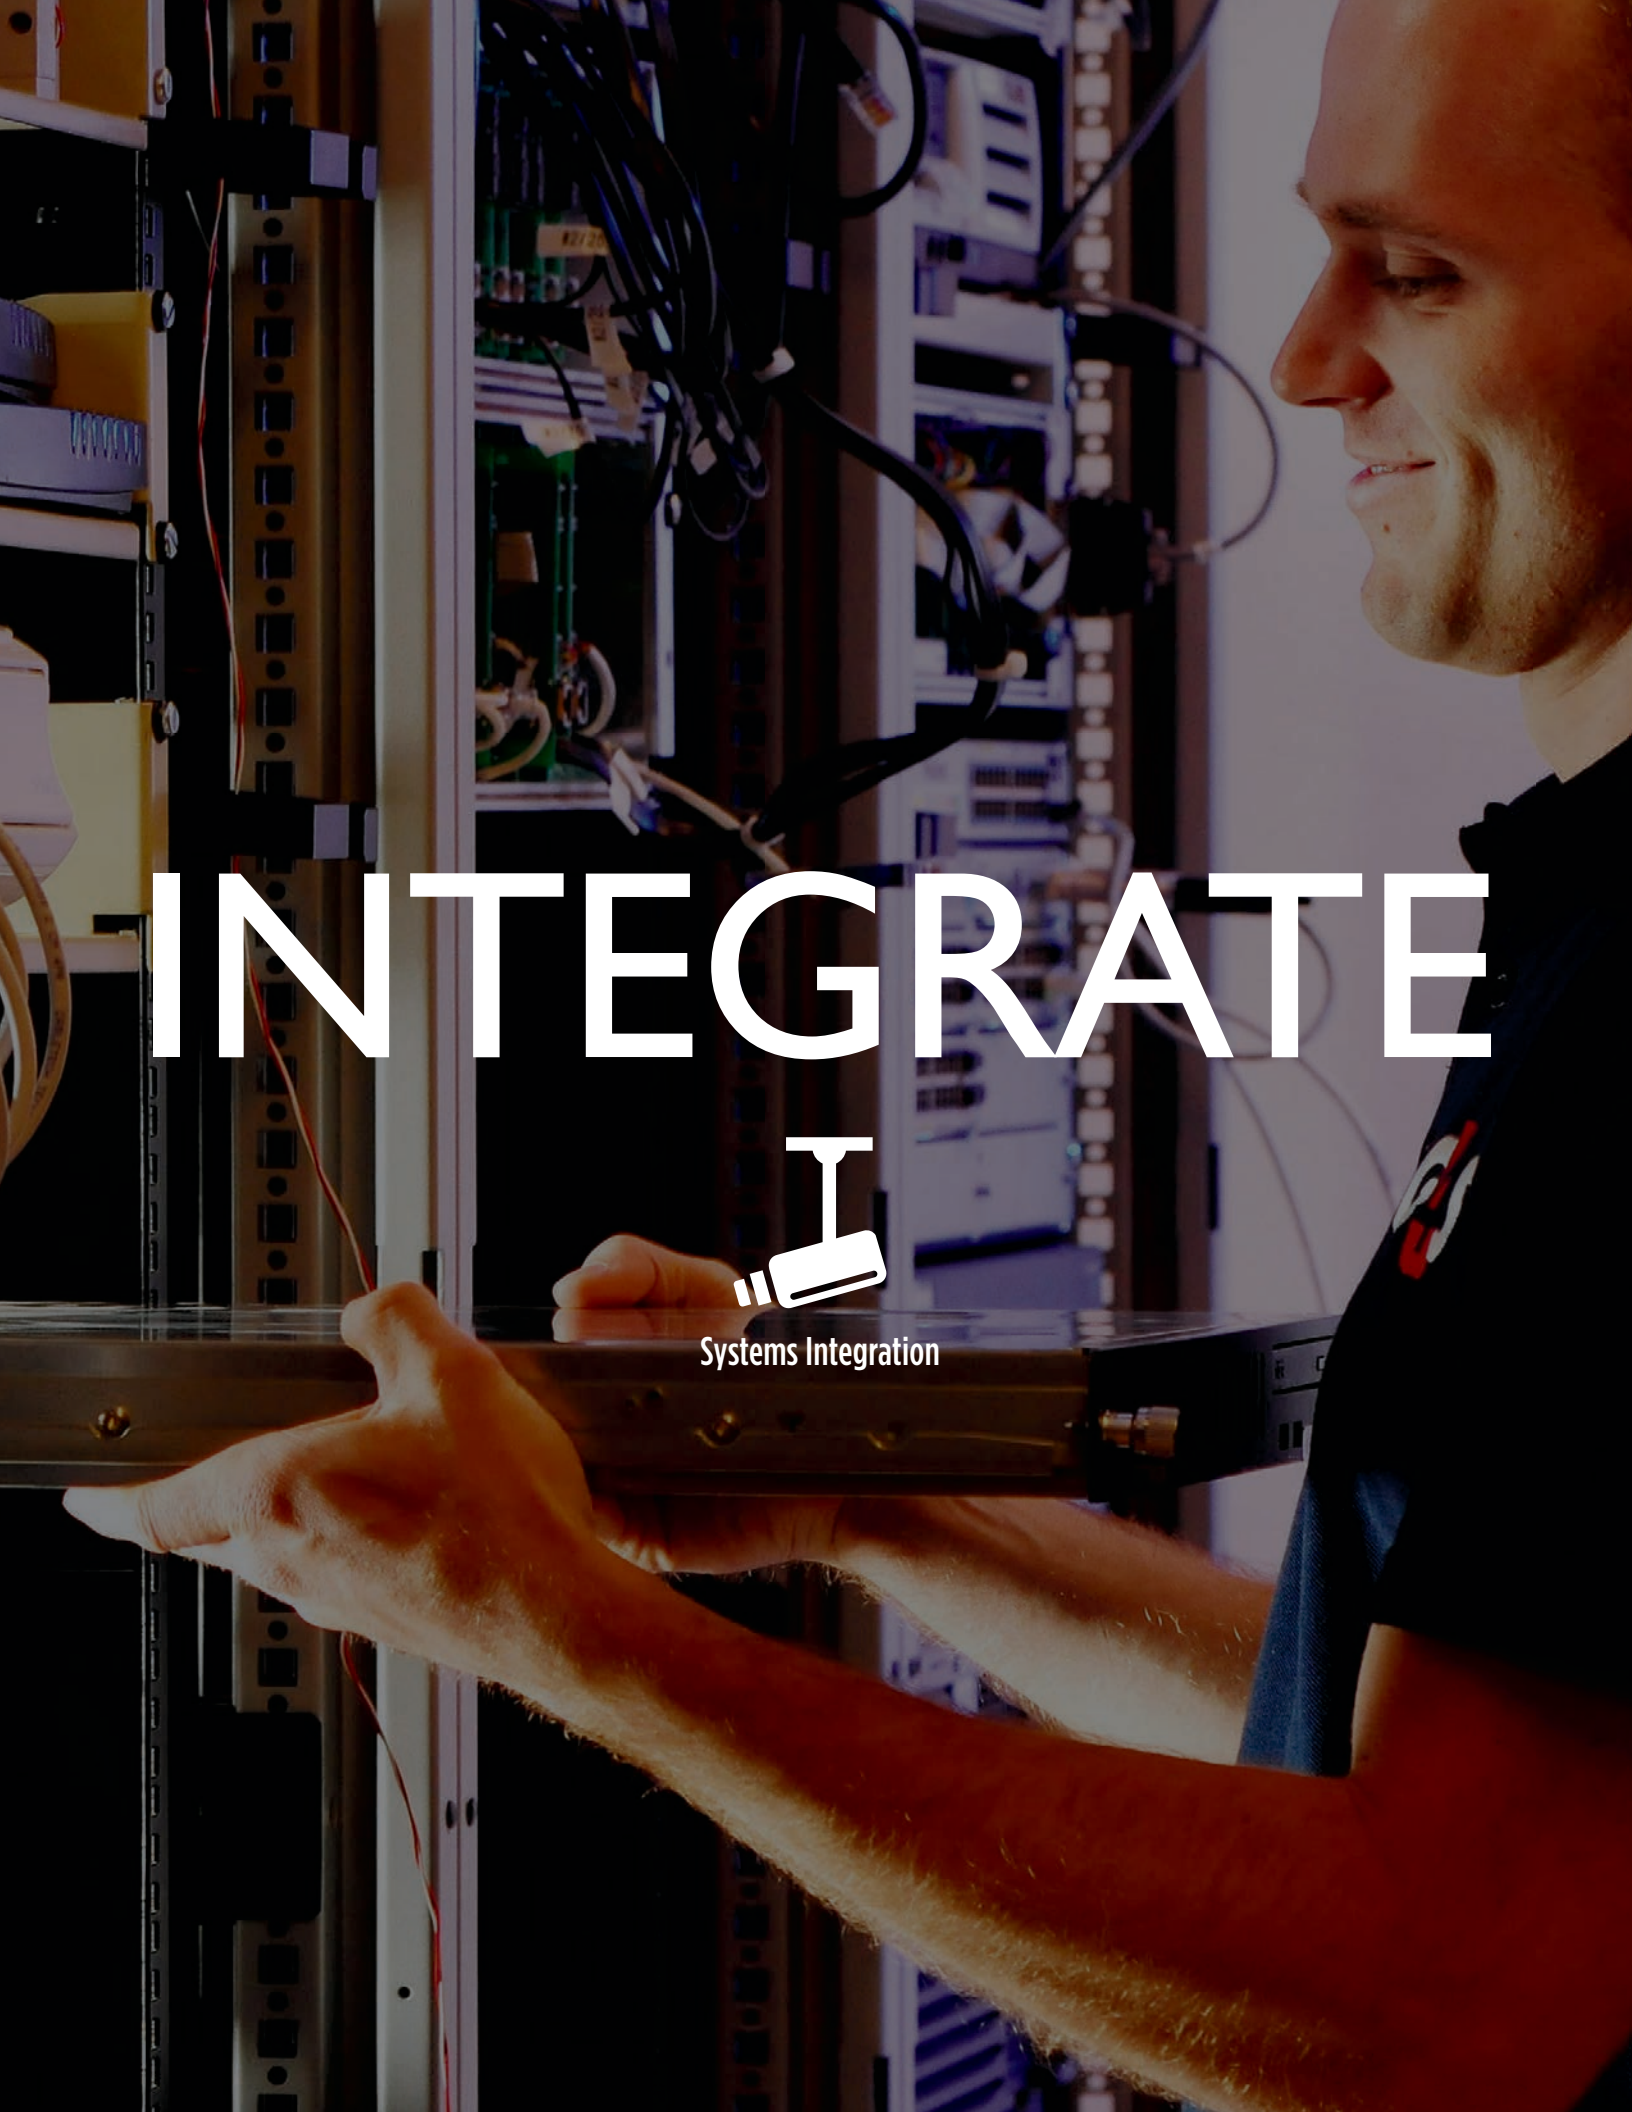

AMAG Technology earned its reputation in the market with the Symmetry access control platform, and is known today for building complete, end-to-end solutions for customers that meet all their system needs. The Symmetry product suite provides identity management, alarm handling, visitor management, video management, mobile applications and policy-based solutions for industry-specific reporting and compliance. The cutting edge technology within every Symmetry installation ensures seamless, multi-way (bi-directional) communication between the various technologies in a single platform. This delivers unprecedented levels of system intelligence that can create alerts only at times of potential risk.

Our scalable solutions are cost-efficient

Every Symmetry security solution allows you to migrate to new technology in a cost effective way. We understand that existing systems may be in place, and we thrive on managing complex transitions from a current system. Because the system is IP based, the security solution can be simply connected to an existing IT network to further reduce installation and cabling costs.

Our platform lets you grow to meet your changing needs

The Symmetry solution is flexible, cost-effective and easy to use, making it the perfect choice for organizations of any size. Open integrations to third-party products for audio, fault tolerant applications, HR reporting, a wide range of HD cameras, biometrics and much more allow for a complete, scalable solution. With Symmetry, a system can start small and grow to meet the needs of any size organization, so that you can meet industry compliance requirements while keeping premises secure and people safe.

**From integration
comes optimization.**

G4S brings your systems together. We design, build and maintain stand-alone and integrated security systems. A trusted partner to customers and suppliers, G4S takes great pride in delivering outstanding expertise and superior service. Our knowledge of a wide range of technologies, products and capabilities provides cost-effective, reliable and scalable solutions.

Successful collaboration leads to results

G4S is known in the industry for our proven experience as an established, large-scale systems integrator providing security solutions. We collaborate with you to effectively mitigate risk and maximize return on investment.

We go beyond systems integration

Our security integration team brings a history of providing the highest standards of achievement in design, engineering, technology and integration of enterprise security systems. Our team customizes your security solutions to meet your specific needs and requirements. We have experience in a wide range of technology and products, and back our engineering, technical and management expertise with dependable maintenance support and training to create cutting-edge, reliable solutions.

Our high standards lead the way

G4S partners with you to establish security standards and exceed compliance regulations. We provide commercial, industrial and government customers with a single source of expertise, and specialize in a variety of vertical markets. Our UL Listed and CSAA 5 Diamond Certified Video Monitoring and Operations Center provides round-the-clock monitoring services. From development and design through installation and ongoing maintenance, we are a true partner, creating sustainable solutions that exceed expectations.

STAFF

Security Officers

Respond.
Report.
Protect.
Prevent.

G4S security officers create significant value for customers through our people, account management, software and innovative programs. Whether your location involves extensive customer interaction or significant security challenges, we have the right personnel for the job.

We employ the best of the best

Our security officers are carefully screened, background checked and recruited according to qualifications, experience and disposition. We understand that the foundation of a security program's success is the quality and performance of the assigned personnel.

G4S was the first company to introduce experience-based officer programs to give customers the flexibility to select the right officers to meet their individual security and customer-service requirements. We offer a variety of programs to meet your needs, including our elite Custom Protection Officers®, who must have either military or law enforcement experience or a criminal justice degree.

Best-in-class Training

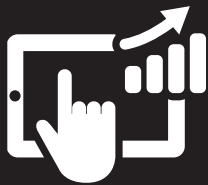

G4S security officers are trained through our ISO-certified G4S North America Training Institute (NATI) corporate university, the only certified corporate university in the industry. Our commitment to ISO certification and comprehensive development attests to the world-class training we provide our officers, giving you confidence that our officers are competent, professional and fully prepared to serve the complex needs of a dynamic customer environment.

Smarter security programs with G4S software

Our security program uses the latest technology to increase security officers' efficiency. We designed Secure Trax®, our mobile officer-management platform, that allows you to see where and what your officers are doing at all times. Secure Trax capabilities include incident capture and notification, GPS plotting, guard tour documentation, time and attendance and safety and facility inspections.

SECURE

It's physical security for your business and emotional peace of mind for your people, all created by the integration of innovative products and services from G4S.
