Compliance & Investigations

G4S offers 24/7 availability with thousands of investigators, risk advisors and protective agents strategically located throughout the United States and 136 countries. Business risks are unavoidable, and we work with customers to create and implement integrated investigative and compliance strategies focused on reducing risk, increasing revenue and expanding profitability. We provide access to unparalleled industry knowledge backed by customized business models and extensive resources.

Systems Integration

G4S designs and builds end-to-end security and communication systems solutions. Our UL Listed and CSAA 5 Diamond Certified Monitoring Center provides remote video/network equipment monitoring and video analytic capabilities. Our knowledge of a wide range of technologies, products and systems provides cost-effective, reliable and scalable solutions. We help customers create standards and exceed compliance regulations, from development through installation and ongoing maintenance.

AMAG Technology

AMAG Technology, a G4S company, manufactures and deploys the Symmetry™ product line, one of the leading global brands of access control and video management in the world. We develop robust technology for identity management, video and intrusion. Symmetry also offers the best solution for large, enterprise-class security systems to meet compliance requirements through the use of a policy-based software platform called Symmetry™ CONNECT.

Security Officers

G4S provides award-winning security personnel, management and software to accelerate safety and security programs to new levels of performance. We offer a variety of security officer services and continue to win awards for our superior performance and robust training program. We integrate technology to provide customers with proactive methodologies to manage their security personnel and incidents through software such as SecureTrax® and RISK360®.

Securing Your World

AMAG Technology

AMAG Technology's Symmetry™ Security Management System provides leading technology solutions for the design, deployment and maintenance of stand-alone or integrated electronic security systems. At AMAG, we take great pride in delivering both quality products and superior professional services to design and deploy state-of-the-art total security systems.

We earned our reputation in the market for our Symmetry access control platform, and today we are known for building complete, end-to-end solutions for our customers that meet all their system needs. We deliver identity management, alarm handling, visitor management, video management, mobile applications and policy-based solutions for industry-specific reporting and compliance.

Customers can take advantage of our open integrations to third party products for audio, fault tolerant applications, HR reporting, a wide range of HD cameras, biometrics and much more for a complete integrated solution. Symmetry is flexible, cost effective and easy to use, making it the perfect choice for organizations of any size. With Symmetry, your system can start small and grow seamlessly to meet the needs of your organization, so that you can meet industry compliance requirements while keeping your premises secure and your people safe.

Our customers know we offer many advantages

- An experienced, professional team that provides exceptional customer service
- Quality security software and hardware with open integration options
- Global service offerings and enhanced resources as part of G4S
- Flexible, scalable, cost-effective solutions that protect your investment and grow with your organization's needs

Symmetry security management solutions can be found in commercial, government, education, healthcare, utility and transportation markets around the world. AMAG has delivered more than 30,000 systems in 90 countries by working together and listening to our clients' individual needs.
