

CENTER OF EXCELLENCE Technology

Capabilities Statement

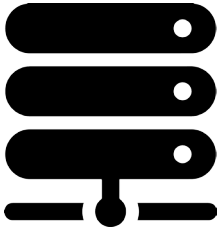

The G4S Secure Integration Center of Excellence (COE) for Technology brings a history of providing the highest standards of achievement in design, engineering, technology and integration of enterprise electronic security systems for G4S clients. The Center of Excellence for Technology maintains a large staff of security industry professionals including Program and Project Managers, System Engineers and Technicians experienced in providing sophisticated security products and services including: Video Management Systems, Access Control and Biometrics, Intercom, Fiber and Network Communications and more. Members of this COE are considered electronic security systems integration experts providing innovative technology solutions and a center for program management knowledge. The G4S Secure Integration Center of Excellence for Technology specializes in the corporate technology market including security systems integration for our clients with data center facilities and corporate campuses.

Core Competencies

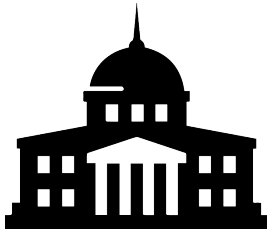

- Certified and experienced in all major security manufacturer product lines
- Security systems design and engineering
 - Complex security systems integration
 - Enterprise architecture security system implementation
 - Physical Security Information Management Systems (PSIM)
 - Evaluation and application of technology
 - Support for installation standards development
 - Professional construction CAD designs and as-builts, 3-D/BIM Support
 - UL and LEED Compliance Support (UL 2050)
- Broad Experience in:
 - Data center security operations
 - Manufacturing
 - Large campus environments
- Experts in delivery of large complex security applications:
 - Remote application deployment
 - On-site expertise
- Security system maintenance and audit programs
- Program Management Organizations (PMO)
 - Professional project management delivery process
 - Significant engineering and staffing resources

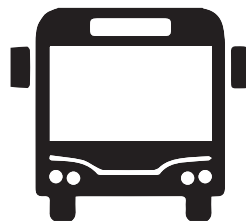

Industries Served

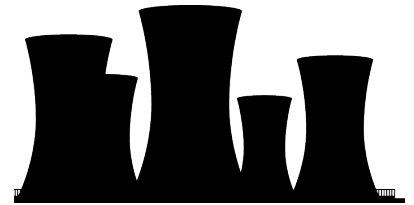

Data Center

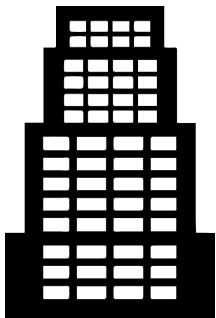

Government

Transportation

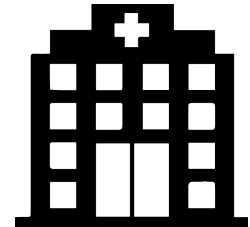

Critical Infrastructure

Skyline Projects

Campus Environments

Healthcare

Key Differentiators

- Extended COE capabilities leveraging other G4S Secure Integration Centers of Excellence including, Engineering, Technology, Managed Services, Risk and Business Intelligence
- Department of Homeland Security SAFETY Act Certified
- TWIC Certified and Credentialed team members
- Certified in all major video and access products
- Various IT Related Certifications
- Site specific DOD Clearances as required
- Site specific NERC/CIP Certifications and Compliance
- Recognized by National Safety Council as a safety program industry leader
- Strategic long term technology planning experience
- Consistency and efficiency of delivery through proven processes and practices established by our veteran management team
