

Systems Integration

G4S systems integration brings your systems together. We design, build and maintain stand-alone and integrated security systems. A trusted partner to customers and suppliers, our systems integration team takes great pride in delivering outstanding expertise and superior service.

G4S is known in the industry for our proven experience as an established, large-scale systems integrator providing security solutions. We work with customers in a collaborative manner that effectively mitigates risk and maximizes return on investment.

Our customers are industry leaders

The G4S systems integration teams help to establish our customers as industry leaders. We work with them to build standards and exceed compliance regulations, improve lives and develop greater future economic opportunities. To do this, we provide commercial, industrial and government clients with a single source of expertise for all their security needs.

G4S has designed and deployed thousands of complex security systems for utilities, municipalities, federal, state, local government agencies, health care providers, corporations and higher education.

We partner with you to find the right technology

G4S systems integration customizes layered security solutions. Our experience in a wide range of technology, products and systems, combined with strict attention to design detail, meets the diverse needs of our customers.

G4S has several extended center of excellence capabilities, including design and engineering, technology and managed services, that help our customers build and integrate the right solutions for their needs. We take a vendor agnostic approach, selecting the right technology that best fits our customers' strategy.

We have deep knowledge and experience

We back our engineering, technical and management expertise with dependable maintenance support and training to create cutting-edge solutions, including:

- Electronic Security
- Data Analytics
- Monitoring Services
- Systems Integration
- Video Surveillance

Risk Consulting

Because business risks are an unavoidable reality, G4S implements integrated strategies focused on reducing risk, increasing revenue and growing profits. We provide access to unparalleled industry knowledge, expert consulting and integrated technologies, backed by customized business models, extensive global resources and outcomes. By positioning comprehensive risk management at the forefront of your strategies, you are not only protecting your physical assets, but you are also protecting the most valuable assets – your employees, customers and business information.

Systems Integration

G4S designs and builds and maintains stand-alone and integrated security systems. Our knowledge of a wide range of technologies, products and systems provides cost-effective, reliable and scalable solutions. We help customers meet standards and exceed compliance regulations, from development through installation and ongoing maintenance. From consulting and design, through technology deployment and integration, our team provides turnkey solutions to effectively secure critical infrastructure, energy and chemical facilities, ports and airports, corporate facilities and more.

Software & Technology

Whether it be an advanced incident management software such as RISK360®, or our award-winning Secure Trax® mobile officer-management platform, G4S can help augment your security professionals with the right technology. We can also leverage our Symmetry™ product line through AMAG Technology, one of the leading global brands of access control and video management in the world. AMAG develops robust technology for identity management, video and intrusion and provides intelligent, networked solutions to manage access, video and security challenges.

Security Officers

G4S provides award-winning security personnel, management and software to accelerate safety and security programs to new levels of performance. We offer a variety of security officer services and continue to win awards for our superior performance and robust training program. We integrate technology to provide customers with proactive methodologies to manage their security personnel and incidents through software.
