

Ensuring Security and Safety
in the Energy, Chemical and Petrochemical Sectors

Securing Your World

G4S Offers Solutions for the Changing Face of Security

Your Challenges

G4S knows energy, chemical and petrochemical industries face a series of increasing security challenges. From evolving federal regulations, maintaining impeccable safety records, developing emergency and disaster plans to protecting intellectual property, we know your security needs are unlike any other.

Our Solutions Strategies

In more than 120 countries around the world, G4S provides answers for this complex sector as a security solutions expert with substantial resources, technology and strategies. G4S integrates its own technology, engineering and design, emergency response and the very best security officers, into seamless solutions for your specific needs.

Our Services

From risk-based analysis and planning, providing technology and manpower, G4S is the leader in energy, chemical and petrochemical security.

Safety Programs

As the leading provider of security services to the energy, chemical and petrochemical sector in the United States, G4S has developed a corporate culture that has resulted in one of the best safety records in the industry. With dedicated national, regional & local safety resources and training programs, G4S brings the right safety prevention and management components to your facility.

Custom Protection Officer®, CPO

The G4S CPO is an elite security professional with specific qualifications, screening and training for complex industries with above average risk or considerable government regulation.

Qualifications

All G4S CPO officers have military or law enforcement backgrounds or hold a college degree in the criminal justice field.

Screening

All G4S CPO officers are subjected to a stringent G4S background investigation and psychological assessment.

Training

All G4S CPO officers complete a G4S 50-hour chemical & petrochemical training program focused on industry safety, anti-terrorism, CFATS or MTSA regulations, as well as other topics critical to the safe and secure operation of a chemical / petrochemical facility.

Emergency And Disaster Security Response

G4S has extensive worldwide experience in providing security before, during and after all levels of emergencies in the energy, chemical and petrochemical sector. Historically, our unmatched experience in emergency security response has allowed strategic customers to operate after hurricanes, earthquakes, floods, environmental catastrophes, terror threats and labor disputes. G4S will assist you with emergency response planning and a confidential risk analysis that will identify critical assets. At the time of the incident, G4S will be ready to deploy highly trained Custom Protection Officer® personnel to secure your affected facilities.

Offering G4S Technologies

G4S has substantial resources and industry-specific expertise to analyze, plan and then implement individualized technological components to meet your comprehensive needs. With our G4S engineering and design capabilities, we can secure your people, assets, building environments and products. G4S is a leader in providing technology solutions for a single facility or a nationwide corporate network. Some of our G4S technology solutions include:

- Access control and card readers
- Facilities management
- Remote guarding
- Alarm monitoring and response
- Digital video
- Command and control

Investigations

Energy, chemical and petrochemical companies invest substantial funds in finding natural resources, then developing innovative ways to process and utilize those assets for a competitive advantage. G4S offers specialized investigation services that combat internal and external threats to your workplace, operations and research & development programs including:

- Database investigations
- Corporate risk investigations
- Safe2Say anonymous hotlines
- Surveillance solutions
- Workers' compensation investigations
- Suspicious claims and fire investigations

Security Administration Technology, Secure Trax™

The exclusive G4S technology solution, Secure Trax™, provides critical, real-time information for management and security officers at your facility. Secure Trax™ provides:

- Real-time flow of security and business information
- Incident reporting
- Safety notifications
- Facilities maintenance reporting
- GPS officer location
