G4S Secure Solutions for Hospitals and Healthcare Facilities

New Safety and Security Solutions for Hospitals and Healthcare Facilities

G4S combines the highest level of manned security with technology, support services and expertise

G4S is the most experienced and prepared security company serving hospitals and healthcare facilities. We provide specialized people, programs and exclusive technology designed to ensure the safety and security of patients, visitors and medical professionals in your complex facility.

We understand hospitals and healthcare facilities are some of the most active and dynamic public places. With many entrances, visitors, vendors and staff, the job of protecting people and property while maintaining privacy and the continuity of care is a challenge. G4S meets and exceeds expectations in this demanding and specialized environment.

Our Partnership Helps You Maintain Standards Required by:

- The Joint Commission (TJC)
- National Patient Safety Goals
- Healthcare Insurance Portability and Accountability Act (HIPAA)
- Center for Medicaid/Medicare Services (CMS)
- National Center for Missing and Exploited Children
- Hospital Consumer Assessment of Healthcare Providers and Systems (HCAPS)

Compliance

G4S is the preferred compliance and security partner for hospitals and healthcare facilities. As the government requires new and changing regulations, site security and emergency planning, evaluations and inspections, G4S is there to assist you with compliance and requirements for The Joint Commission, HIPAA, CMS and all other accreditation inspections.

AMBULANCE ENTRANCE ONLY

G4S Healthcare Services

Your sensitive environment requires the best

G4S Manned Security Solutions

G4S security and safety officers are ranked #1* in reliability, ethics, speed of response and adherence to rules and procedures by our customers. Most importantly, our officers are specially selected for the healthcare environment. They are committed specialists, trained to recognize and understand the unique environment in which they work and the values important to your healthcare facility.

All G4S officers are equipped with exclusive G4S Secure Trax® technology, an exclusive performance and compliance tool developed to run on mobile devices. The integration of G4S officers with powerful G4S technology provides quality and value for your public safety and security programs.

Custom Protection Officer®

The G4S Custom Protection Officer® (CPO) assigned to healthcare facilities has been recruited from a highly specialized talent pool. A G4S CPO must have military or law enforcement experience or a college degree. Only one out of every ten applicants qualifies to be a G4S CPO.

Upscale Security Officer

The G4S Upscale Security Officer (USO) can be an integral part of security programs for hospitals and healthcare facilities. The G4S USO has at least an Associate's Degree or higher, military service or successful security experience.

Property Resource Officer

Our G4S Property Resource Officer (PRO) is also an important multi-faceted part of your healthcare environment. We understand the PRO is part security, ambassador and observer. The G4S PRO provides you with qualified security personnel tailored to your specific needs.

Additionally, G4S officers provide these essential hospital safety and security services:

- Facility Inspections
- Security Patrols
- Employee Escorts
- Patient Watch

G4S security officers are background checked using both federal and local databases, pre-screened, drug tested and trained to reflect your needs.

Healthcare Officer Training

All G4S officers are trained for the unique healthcare environment in which they work. Hospital security officers receive instruction on non-violent crisis intervention, healthcare regulation compliance, HIPAA, CPR and Hazmat training. Mandatory training includes 40 hours orientation, 8 hours CPI/MOAB and 8 hours annually.

Canine Protection

Hospital and healthcare centers are facing increasing challenges with rising violence in and around Emergency Rooms, parking facilities and hospital grounds. Hospitals are turning to G4S Canine Protection to maintain a safe work environment for healthcare staff and de-escalate potentially unstable situations.

Transportation Services

G4S transportation provides timely, reliable and professional services for doctors, staff, administration or patients who travel to remote parking areas, satellite medical facilities or associated healthcare centers.

Emergency Response

G4S is a valuable partner for hospitals and healthcare facilities as they plan, manage and execute their emergency compliance requirements. Our teams are trained to understand the role and capabilities of hospitals in community emergency response systems.

G4S Healthcare Technology

Protecting people and property
while maintaining privacy and the continuity of care

Secure Trax®

G4S has revolutionized and expanded the technology horizon for security officers with Secure Trax®. The fusion of G4S officers with Secure Trax® provides you with the highest level of performance available today. Secure Trax® offers incident capture and notification, GPS plotting, guard tour documentation, time and attendance and safety and facility inspections. Secure Trax® lets officers capture and record incident information and send notifications to appropriate staff, all in real time. Using the Secure Trax® customizable safety and facility inspection modules, officers can record inspection activity, safety surveys, behavior-based surveys, facilities checks and more. Only Secure Trax® connects G4S security officers with your customized secure business intelligence portal and/or RISK360™.

RISK360™

RISK360™ is a highly customizable incident and case management software designed to manage risk, improve business performance, maintain regulatory compliance and reduce costs. RISK360™ captures incident information, providing notifications, incident review and case management. RISK360™ also highlights emerging trend analyses and measures improvement outcomes allowing healthcare facilities to optimize their safety and security operations. RISK360™ helps hospitals provide a secure environment for patients, visitors and staff.

Remote Guarding

When healthcare facilities and hospitals need extra eyes on parking lots, secure entrances and assets, G4S Video Monitoring Center provides unmatched capabilities. Remote Guarding can provide a 24/7 pro-active approach to security and safety with video tours, video chaperoning, two-way voice communication and the detection of threats through the use of video analytics. These powerful tools can improve security, leverage technology investments and reduce costs.

OneFacility

OneFacility is a comprehensive suite of technologies with components for access control, video security systems and software for facilities management and administration. OneFacility offers software from a single intelligent source to help you with:

- Visitor management
- Vendor management
- Vendor credentialing
- Access control logs

A smiling man with a mustache, wearing a white uniform shirt and a black radio around his neck. He is standing in front of a red ambulance. The background is slightly blurred, showing the side of the ambulance and some greenery.

G4S Support Services

G4S can provide hospital and healthcare facilities with integrated security systems, technology and services to support your facility, mitigate risk and safety concerns and maintain compliance within a caring and supportive environment. Our support services include:

Security Surveys

G4S teams are skilled and experienced at conducting effective initial and annual security and safety surveys, identifying safety threats to your hospital and staff and recommending protective strategies to mitigate threats.

Security Management Documents

G4S provides one-stop assistance with security and safety management documentation including planning, post orders, HVA and EOC annual reviews.

Employee Education

G4S will provide informative "Town Meetings" to hospital administration and staff as a way to educate and discuss specifics on hospital security and safety procedures, personal safety tips and crime prevention awareness. The G4S Town Meetings will also provide some basic training in violence prevention to help hospital staff recognize potentially violent patients and visitors.

G4S Provides Hospitals with Quality and Measurable Value

From the largest hospitals to local healthcare facilities, our highly trained G4S officers and cutting-edge technology bring unsurpassed safety and security solutions to help manage risk and reduce costs. Call us today to find out how we can partner with you.
